## Pagers

Each firefighter will be issued an alphanumeric Motorola Advisor pager for fire and medical calls. An AA sized battery powers the pager. When a LOW CELL alarm is sounded, batteries are available at the station for replacement. The pager can be set in a TONE, VIBRATE, or VIBRATE and TONE mode.

The pagers are also capable of receiving personal messages. Excessive use of the pager as a personal pager may result in the termination of those privileges.

If the pager malfunctions, report to a Chief Officer. DO NOT attempt to repair the pager yourself.

If the pager is damaged by horseplay, the person responsible will be required to pay for the pagers repair
